*Learning for
the Digital Age*

Navigation & Selection

NAVIGATION

1. Move around the spreadsheet using the following key, note what they do:
 - a. **Ctrl** + the **arrow keys**
 - b. **Ctrl** + **Home**
 - c. **Ctrl** + **Page up** & **Ctrl** + **Page Down**

SELECTION

2. Highlight sections using the following:
 - a. Hold **Shift** and then press the **arrow keys**
 - b. Click a cell, hold the **Shift** key, then select another cell
 - c. Click a cell, hold the **Ctrl** key, then select another cell
 - d. Click the square between **1** and **A**
 - e. Press **Ctrl** + **A**
 - f. Hold **Ctrl** + **Shift** and press **→** to highlight the row

FIND & REPLACE

3. Click the **Find** icon (**Ctrl** + **F**)
4. In the **Find what:** box **type** what you are searching for and click **Find Next**.
5. Use the **Replace** box to correct spelling mistakes, date formats and fill blank cells
6. Open **Options** to find and replace across worksheets

FREEZE PANES

7. To freeze a row, highlight the row below.
8. Open the **View** tab and select **freeze panes**.
9. To freeze a column, highlight the column to the right. Turn on freeze panes.
10. To freeze both a row and a columns, select a single cell below and to the right of what you want to freeze.

MULTIPLE WORKBOOKS

11. Open a new blank workbook (**Ctrl** + **N**)
12. Press **Ctrl** + **Tab** move between open workbooks
13. **Alt** + **Tab** allows you to move between applications
14. To view both workbooks at the same time, open the **View** Tab click **Arrange All** and select **Vertical**
15. To view two worksheets within the same workbook at the same time, click **New Window**, then **Arrange All** and select **Vertical**

Sort & Filter

SORTING

1. Highlight the column headings and apply a filter (**Ctrl + Shift + L**) or open the **Sort & Filter** icon and click **Filter**
2. You can sort text, numbers, dates and colours.
3. Note the **down arrow** that appears when you sort a column of data

CUSTOM SORT

4. To sort multiple columns, highlight all the data and one row of headings.
5. Open the **Sort & Filter** menu click **Custom Sort...**
6. In **Sort by:** box choose the first column to group
7. Click **Add Level** choose the next column to group
8. Choose to **Sort On** values or colour
9. Select the **Order** of the sort

FILTERING

10. Highlight the row of headings
11. Click the **Sort & Filter** icon and select **Filter**
12. Open the **filter** to view each unique value in that column
13. Untick **Select All** to remove all the ticks
14. **Tick** each entry you wish to view
15. Alternatively, use the **Search** bar to find and filter on an entry
16. In a column with text, click **Text Filters** for advanced filtering options such as Contains, begins with, greater than, less than...
17. In a column with dates, click **Date Filters** or in a column with numbers, click on **Number Filters** for advanced filtering options
18. To unfilter the data either:
19. Open the filter menu on filtered column and select **Clear Filter**
20. Or click on **Clear** from the **Data** tab to clear all the filters
21. To filter by colour, open a filter menu and select **Filter by Colour**. Select the colour or **No Fill**
22. Filters can be removed by re-clicking the **Filter** icon in the **Sort & Filter** menu or **Ctrl + Shift + L**

Basic Formulas

RELATIVE FORMULAS

1. Highlight a group of values and note the SUM, COUNT, NUMERICAL COUNT, MAX, MIN and AVERAGE **FIGURES** in the **Status Bar**
2. If you are missing figures for these functions, **right-click** on the **Status Bar** and tick the missing formulas.
3. Highlight the cells that you want to total and click the **AutoSum** icon
4. Click the **down-arrow** after the **AutoSum** and note the options available
5. Use the **Autofill Handle** to complete the formula across the remaining columns
6. Alternatively, type the formula **=SUM(range)**
7. Insert a formula to calculate the average expenditure for each month. Repeat the above step changing the **Function** from **SUM** to **AVERAGE**
8. Other functions:
9. **=MIN(range)** identifies the smallest amount
10. **=MAX(range)** identifies the largest amount
11. **=COUNT(range)** counts the number of cells containing a numerical value

ABSOLUTE REFERENCES

12. **Dollar signs** are used around a cell reference to fix it in place (an **absolute reference**) to that when it is being dragged across by the autofill handle the cell ref does **NOT** change.
13. Press **F4** to quickly add **\$** to a cell reference.
14. Calculate a percentage by multiplying the value by a percentage
15. **=D23** (the value) * **E23** (the percentage)
16. Link a cell value from one worksheet or workbook to another, type **=** (Equals) in the chosen cell.
17. Find and click the value to link and press **Enter**
18. When the value in the linked cell changes, this will automatically update in the other cell.
19. Text before a **!** identifies the name of the worksheet
20. Text in **[brackets]** refers to the name of the workbook.
21. The cell reference is always surrounded by dollar signs **\$** when links are made between workbooks.

FUNCTION

=SUM(B4:B14)

RANGE

(Identifies the figures to be included in the formulas)

/ Divide

+ Add

* Multiply

- Subtract

	2,000.00	2,000.00
	3,721.50	

Telephone	69.00	69.00	69.00
Rent	1,000.00	1,000.00	1,000.00
Salaries	2,000.00	2,000.00	2,000.00
GBP Total	3,721.50		
Average	=AVERAGE(B5:B14)		
Maximum	AVERAGE(number1, [number2], ...)

Inputting & Layout

DATA INPUTTING

1. Always use the **Tab** key to move from one cell to the next.
2. Type **January** into a cell
3. Position the cursor over the **Auto fill handle**, when a small black cross appears, drag the handle so the remaining months of the year are completed
4. The **Autofill handle** will also work with:
5. Monday, Tuesday, Day 1, Day 2....., Jan, Feb, Mar...Qtr 1, Qtr 2... Your name.....
6. Type a number to create a series click the **smart-tag** and select **Fill Series**
7. Repeat this with dates, this time click **Copy cells**

RESIZING & INSERTING COLUMNS

- ##### means that the column widths are too small
- Highlight the whole sheet and **double-click** the **double headed arrow** which appears between column headings
- To insert a new column select the column to the **right**. Press **Ctrl++**. Press **Ctrl+-** to delete this column
- To insert a new row, select the row **below** and press **Ctrl++**. Press **Ctrl+-** to delete this row

MERGE & CENTER

12. To move a title to the middle of the data highlight the cells you wish to merge. Click the **Merge and Center** icon on the **Formatting Toolbar**

ZOOM CONTROLS

13. To zoom in and out of a spreadsheet. Hold **Ctrl** and scroll the wheel on the mouse up and down

COPY/MOVE WORKSHEET

14. To copy data from one worksheet to another, **right-click** on the worksheet tab
15. Select **Move or Copy...**
16. Choose which book you wish to move it to.
17. Select the sheet you want it to appear **before**
18. **Tick** the box: **Create a copy**

	Jul	Aug	Sep	Oct	Nov	Dec
24.00	105.00	333.00	235.00	572.00	322.00	24.00
11.00	11.00	11.00	10.00	10.00	10.00	10.00

0.00	11.00	10.00	10.00	10.00	10.00
0.00	135.00	85.00	100.00	110.00	90.00
75.00	27.50	27.50	27.50	27.50	27.50
7.00	107.00	107.00	107.00	107.00	107.00
-	100.00	-	-	-	-
0.00	34.00	34.00	34.00	34.00	34.00

- ☐ Copy Cells
- ☒ Fill Series
- ☐ Fill Formatting Only
- ☐ Fill Without Formatting

Formatting

RESIZING CELLS

1. Highlight the whole worksheet (click the triangle in the top left corner).
2. Wait for the **double-headed** arrow to appear between columns and manually adjust the width of a column to re-size all of them at once.
3. Repeat this for rows if required
4. Alternatively, you can re-size the column and rows to fit the text. Highlight the whole spreadsheet and double-click between either two column headings or two row headings.
5. Click **Wrap Text** so the text fits within a single cell
6. Change the **Alignment** so that the text is in the centre both **vertically** and **horizontally**

USING BORDERS AND COLOUR

7. Change the **Fill** colour on cells or select **No Fill** to remove colour.
8. Highlight the cells that require borders, open the **Border** icon and select a border. To remove unwanted borders, click on **No Border** or use the **Clear Formats** option under the **Clear** icon
9. To highlight rows of totals, click the **Borders** icon and choose the **Top and Double Bottom Border**

NUMBER FORMATTING

10. For accounting format with 2 decimal places & a thousand separator, highlight all the numerical values and press the **comma** icon in the **number** category.
11. Use the **decrease** and **increase decimal** icons
12. Negative numbers need to be shown in red and with brackets. Open the **Format Cell** box and select the **Number** tab and click **Custom**
13. Choose the longest number format from the top. Delete the **minus** symbol and **add brackets** around the negative part of the code
14. Insert a space at the end of the positive part to correct the alignment

COPYING FORMATS

15. To copy the formats of a cell, highlight the cell containing the cell style to copy and **double-click** the **Format Painter**
16. Click and drag the cursor with the attached paintbrush over the cell to be reformatted.

	A	B	C	D
1	Income and Expenditure			
2				
3		January	February	March

Short-cuts

Ctrl + →	Takes you to the last column in the Worksheet containing data
Ctrl + Home	Returns to Cell A1
Ctrl + PgDn / Ctrl + PgUp	Moves between Worksheets
Shift v Ctrl	Use Shift to select cells adjacent to each other. Ctrl to select cells not adjacent to each other
Ctrl + F	Find
Ctrl + H	Find and Replace
Ctrl + N	New Workbook
Ctrl + Tab	Hide/Show other Worksheets
Alt + Tab	Move between other open programs
Ctrl + Shift + L	Add Filter to the selected row
Ctrl + Z	Undo
Ctrl + A	Select All
Ctrl + Shift + →	Select all cells next to each other with data on
Ctrl + +	Insert row
Ctrl + -	Remove row
Ctrl + ;	Insert the date
Ctrl + C	Copy
Ctrl + V	Paste
Ctrl + X	Cut
Ctrl + O	Open
Ctrl + S	Save
